

# UK Postage Rates

Besides each item rather than an amount for P&P you will now find a weight in Kilograms.

All you have to do is total the weight for all the items in your order and then refer to the postage rate table to find the shipping cost for your order.

Otherwise it will be sent second class for smaller items or via next day courier for larger orders (typically over 2 kilos).

Some small items such as key rings, badges etc, have no weight assigned to them, this is because the postage is included in the cost of the item. Therefore if you order one of these items or add it to another order then you do not need to worry about increasing the postage for these items.

The only exceptions to the above are for the engines and heads.

These are a fixed price due to the weight and volume.

If you order anything else as well on the same order then the extra items will be included in the fixed price.

## Royal Mail rates UK Only - weights in Kg

**0.05Kg £3.00**

**0.501 to 0.750Kg £4.50**

**0.751 to 2.0Kg £7.25**

Due to recent changes in the Royal Mail, many items we sell (including all paint touch ups and fuel additives) have to be sent by courier, please use the tables shown below to work out the shipping costs.

## UK Courier rates
